Schools can book MK Art Club to deliver engaging workshops on-site, with activities tailored to suit different age groups and abilities. Whether you're looking for an hour workshop, a full day of workshops or multi-week after-school programmes, we offer flexible options to bring creativity into your classroom.

One-Day Workshops

With MK Art Club, you can book one or multiple 1-hour workshops delivered across a single day. The perfect way to inspire students to explore their creativity through a diverse range of engaging art and craft activities.

Our standard prices are based on a single session for a group of up to 20 students. If you would like to book one of our sessions for a larger group, please email us and we will send over a personalised quote.

Sculpt A Pokemon
From £300 per workshop

Make An F1 Car
From £400 per workshop

Draw A Mural
From £350 per workshop

Make A Stop Motion Animation
From £500 per workshop

Multi-Week After-School Programmes

Our after-school art & crafts programmes are designed to be highly engaging, offering students a fun, structured, and inspiring creative outlet at the end of the school day.

Standard programmes typically run for 6 weeks, with flexible options to condense the programme into 4 weeks or extend it up to 10 weeks to suit your timetable and school needs.

We charge a flat rate of £48 per child for a standard 6-week programme (£8 per session). Each programme runs with a minimum capacity of 12 students and a maximum of 20 students.

Every session is delivered by a DBS-certified artist, ensuring a safe, professional, and high-quality experience from start to finish. All art materials and resources are fully provided so you just need to provide a classroom, some tables and chairs and we'll take care of the rest.

Workshops such as t-shirt design, mug decoration, and hat decoration give students the exciting opportunity to create something personal to take home, while our stop-motion animation programme encourages children to work together, share ideas, and collaborate creatively to produce their own short animation.

- **1 hour per session, 1 session per week**
- **£32 per student for a 4 week programme.**
- **£48 per student for a 6 week programme.**
- **£80 per student for a 10 week programme.**
- **Minimum 12 students per programme**
- **All materials provided**

Creative Ideas

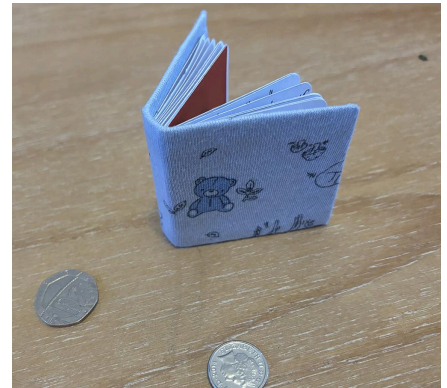

Exploration & Creative Fundamentals

This course is designed to build confidence and imagination through drawing and mixed media. Each week introduces a new creative challenge, from fast-paced drawing exercises and caricature drawing to mug decoration and wearable art. Students will work across a variety of surfaces using multiple drawing techniques while developing their own artistic style. This course encourages experimentation, self-expression and creative thinking.

Comic Book Illustration

Storytelling & Narrative Art

Create your own story through characters, images, and sequential art. Students will develop an original idea or choose from guided prompts before planning and building their comic page by page. Each week builds their skills as they refine artwork and bring their story to life. A range of drawing and finishing techniques are explored to support individual style. The course ends with a completed, bound comic book to take home.

Sculpting

Build A Custom Character

This course focuses on character and creature creation using clay and other sculpting materials. Students will explore shape, texture, facial features, and form while developing their own imaginative characters and creatures. Throughout the programme, students will gradually build confidence by first modifying prepared base sculptures before progressing towards creating an original sculpture completely from scratch.

Model Making

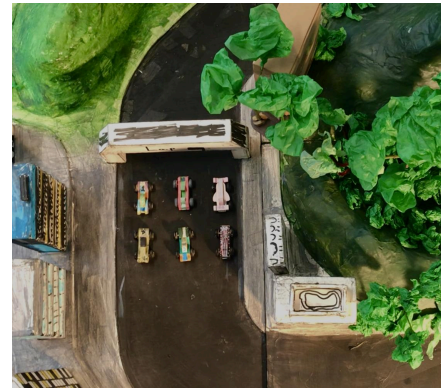

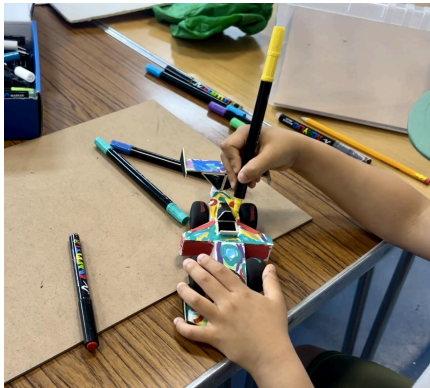

Build A Woodland Retreat

Students will design and build their own miniature woodland environment. Using cardboard, clay, wire, paint and other materials, they will create a magical woodland retreat. This could take the form of a treehouse, hidden cabin, underground home or a magical wooden hut surrounded by nature. Once the model is complete, students will bring their woodland retreat to life by adding small lights in and around the structure.

Stop Motion Animation

Production Design & Filmmaking

In this filmmaking course, students will work together to create an animated short film. They will design characters and props, build sets, and learn how to animate frame by frame using stop motion techniques. Students will also explore sound design and editing software to bring their film to life. The course encourages teamwork, planning, and collaboration, with students taking on different production roles based on their individual strengths.
